### **DETAILED ACTION**

This application is a 35 U.S.C. 371 (national stage) application of PCT/CH03/00523, filed 7/30/2003, which claims benefit of foreign priority to Swiss application 1357/02, filed 7/31/2002. Claims 1-38, as amended, are pending.

### ***Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I:** claims 1-14, drawn to a composition.

**Group II:** claims 15-33, drawn to a method.

**Group III:** claims 34 and 38, drawn to a method.

**Group IV:** claim 35, drawn to a method.

**Group V:** claim 36, drawn to a method.

**Group VI:** claim 37, drawn to a method.

Claims 15-38 employ "use as" language that is not within subject matter defined by 35 U.S.C. 101, and cannot be interpreted by the examiner as being drawn to methods (processes) for making a composition, or methods (processes) for using a composition (for example, in the treatment of a medical condition). If Applicant elects

Group II, III, IV, V, or VI, the elected claim(s) should be amended to clarify the nature of the process claimed and in compliance with US format.

2. As set forth in Rule 13.1 of the Patent Cooperation Treaty (PCT), "the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept." Moreover, as stated in PCT Rule 13.2, "where a group of inventions is claimed in one and the same international application, the requirement of unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features." Furthermore, Rule 13.2 defines "special technical features" as "those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art."

3. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The shared technical feature of Groups I-VI is a quinoxalin-2-one compound such as Caroverine formulated to treat ear conditions, which does not present a contribution over the prior art. As disclosed in Domeisen et al. (*Acta Otolaryngol.* 118, pp. 606-607, 1998), the quinoxaline derivative Caroverine is known in the treatment of tinnitus. A shared technical feature is not a special technical feature if it is not novel. Therefore, the claims are not so linked within the meaning of PCT Rule 13.2 so as to form a single inventive concept, and unity between Groups I-VI is broken.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result**

**in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
